Preface

xiii

1 • Shadows

1.1 What is a shadow?	1
1.2 Brightness of shadows	4
1.3 Colored shadows	4
1.4 Contrail shadows	5
1.5 Opposition effect	6
1.6 Shadows and perspective	8
1.7 Spectre of the Brocken	11
1.8 Mountain shadows	12
1.9 Rays	15
1.10 Other shadow phenomena	17
References	19

2 • Clear air

2.1 Sunlight and atmospheric absorption	21
2.2 The clear blue sky	22
2.3 The sky near the horizon	24
2.4 Sky polarization	26
2.5 Airlight	29
2.6 Color and brightness of the low sun	31
2.7 The aureole	32
2.8 Bishop's ring	33
TWILIGHT	34
2.9 Twilight	34
2.10 Guide to twilight	34
2.11 Twilight arch	35
2.12 Earth shadow and the antitwilight arch	37

2.13 Alpenglow	39
2.14 Purple light	41
2.15 'It's darkest just before dawn'	42
2.16 Twilight and volcanic activity	42
NORMAL ATMOSPHERIC REFRACTION	44
2.17 Atmospheric refraction	44
2.18 Horizons	45
2.19 Flattening of the low sun and moon	47
2.20 Green flash	48
2.21 Twinkling	50
UNUSUAL ATMOSPHERIC REFRACTION	51
2.22 Distortions of the low sun	51
2.23 Mirages	52
2.24 Inferior mirage	52
2.25 Superior mirage	55
2.26 Lateral mirage	58
2.27 Airglow	59
2.28 Aurora borealis (northern lights)	60
References	62

3 • Water and light

3.1 Light from water	65
3.2 Color of pure water	66
3.3 Color from suspended particles	67
3.4 Red tide and phosphorescent seas	69
3.5 Myth of a mirror image	69
3.6 Refraction through the air-water interface	72
3.7 Optical manhole	73
3.8 Polarization and fish-locating goggles	74
3.9 Visibility of waves and the horizon	74

3.10	Wave streaming near the horizon	76	4.21	Cloud blocking	139
3.11	Glitter	77	4.22	Blinks	139
3.12	Skylight reflected from wavy water	81	4.23	Does every cloud have a silver lining?	140
3.13	Moon circles	82	4.24	Walking in a fog	141
3.14	Skypools and landpools	83	4.25	Visibility of the sun through a cloud	142
3.15	Shift of reflected skylight towards the horizon	86	4.26	Once in a blue moon	143
3.16	The caustic network	87	4.27	Haze, smog, and smoke	143
3.17	Cat's paws	90	4.28	Contrails and distrails	144
3.18	Slicks and oil-on-troubled-water	91		ELECTRICITY	144
3.19	Why is foam white?	92	4.29	Lightning	144
3.20	The wet spot	93		References	148
3.21	Shadows on water	94			
3.22	Aureole effect	95			
3.23	Other reflections on water	96			
	References	101			
4	Water drops		5	Ice and halos	
4.1	Sparkling dewdrops	103	5.1	Glints and sparkles	149
4.2	Observations of rainbows	103	5.2	Ice and its optical properties	150
4.3	The primary rainbow	110	5.3	Color in snow banks and glaciers	151
4.4	The secondary rainbow	113	5.4	Introduction to halos	152
4.5	Supernumerary bows	114	5.5	The 22° halo	155
4.6	Tertiary bows	116	5.6	The 46° halo	157
4.7	Alexander's dark band	116	5.7	Circular halos of unusual radii	158
4.8	Polarization of rainbows	117	5.8	Parhelia (sundogs)	159
4.9	Reflection rainbows	118	5.9	Parantheia and paranthelic arcs	163
4.10	Fogbows	120	5.10	Circumzenithal arc and circumhorizontal arc	164
4.11	Cloud contrast bows	121	5.11	Pillars	167
	FORWARD AND BACKSCATTER PHENOMENA	122	5.12	Parhelic circle	168
4.12	Heiligenschein	122	5.13	Tangent arcs of the 22° halo (circumscribed halo of 22°)	168
4.13	Coronae	124	5.14	Subsuns and Bottlinger's rings	171
4.14	Irisation	128	5.15	Halos below the horizon	172
4.15	The glory	130		RARE AND UNUSUAL HALOS	173
4.16	Waterdrop optical effects summarized	133	5.16	Parry arcs	173
	CLOUDY SKIES	133	5.17	Heliac arcs	174
4.17	What is a cloud?	133	5.18	Anthelion	174
4.18	Why are clouds white?	134	5.19	Anthelic pillar	174
4.19	Why are some clouds dark?	134	5.20	Tangent arcs of the 46° halo	174
4.20	Colors of clouds	138	5.21	Lateral arcs of the 22° halo (Lowitz arcs)	175
			5.22	Lateral arcs of the 46° halo	175
			5.23	Anthelic arcs	175
			5.24	Multiple halo displays	176

5.25 Multiple scattering effects	177
5.26 Diffraction halos	177
5.27 Elliptical halos	177
5.28 Halo catalog	178
THE HIGHEST CLOUDS	182
5.29 Noctilucent clouds ('night-shining' clouds)	182
5.30 Nacreous clouds	182
References	182

6 • Naked eye astronomy

DAYTIME	185
6.1 The sun	185
6.2 Sunspots	186
6.3 Solar eclipses	187
6.4 Total solar eclipse phenomena	189
6.5 Eclipse danger to the eye	193
6.6 Unusual eclipse phenomena	194
6.7 Annular and partial eclipses	194
6.8 Future solar eclipses	196
6.9 Artificial satellites	198
6.10 The moon	199
6.11 Phases of the moon	201
6.12 Earthshine	202
6.13 Lunar eclipses	203
6.14 The planets	204
6.15 Meteors	206
6.16 Grazing meteors	206
6.17 Comets	208
6.18 Zodiacal light and gegenschein	210
6.19 Stars and the stellar magnitude scale	211
6.20 Daytime visibility of stars	213
6.21 Constellations and star names	213
6.22 Double stars, variable stars, novae, and supernovae	213
6.23 Star clusters and nebulae	214
6.24 The Milky Way	214

6.25 Galaxies	214
THE NIGHTLINE SKY	215
6.26 Light of the night sky	215
6.27 Urban glows	215
6.28 Starlight	217
6.29 Olbers' paradox	217
References	218

7 • Observing

HUMAN VISION	222
7.1 The eye	222
7.2 Photopic (cone) vision	222
7.3 Scotopic (rod) vision	223
7.4 Angular resolution of the eye	223
7.5 Time constants of the eye	223
7.6 Color vision	224
SUBTLETIES OF VISION	225
7.7 Mach bands	225
7.8 Irradiation	225
7.9 After-images	225
7.10 Illusions	226
7.11 Haidinger's brush	227
7.12 Floaters	228
OBSERVING TOOLS	229
7.13 Cameras	229
7.14 Polarizers	229
OBSERVING TECHNIQUE	230
7.15 Measurement of angles	230
7.16 Universal Time	231
7.17 Out-of-focus viewing	231
7.18 Observations from an airplane	234
References	236

Glossary	237
