Contents

PREFACE	vii
INTRODUCTION	ix
CHAPTER 1. ELEMENTS OF CONTAMINANT-DIFFUSION THEORY	1
1.1. Molecular Diffusion	1
1.2. Contaminant Diffusion in Turbulent Flows	7
1.3. Turbulent Diffusion Coefficients	9
1.4. Dependence of Transport Coefficients upon the Determining Factors	18
1.5. Diffusion Models with Transport Coefficients Depending on Time and the Phenomenon Scale	31
1.6. Contaminant Diffusion in a Non-Homogeneous and Non-Stationary Mean Current Velocity Field	39
1.7. Diffusion of Discrete Particles in the Turbulent Flow	45
1.8. Concentration Fluctuations for the Diffusion Contaminant	52
CHAPTER 2. DIFFUSION OF CONTAMINANTS FROM LOCALIZED SOURCES IN THE OCEAN	61
2.1. Experimental Methods of Studying the Diffusion of Contaminants in the Ocean	61
2.2. Diffusion from Instantaneous Point Sources	75
2.3. Diffusion from Continuous Point Sources	113
2.4. Diffusion of Discrete Particles in the Ocean	147
CHAPTER 3. DIFFUSION OF CONTAMINANTS FROM DISTRIBUTED SOURCES IN THE OCEAN	157
3.1. Diffusion of Contaminants Fallen Out of the Atmosphere	157
3.2. Diffusion of Biogenic Elements, Oxygen and Carbon Dioxide in the Ocean	174
3.3. Some Aspects of Oil-Spot Diffusion	190
3.4. Diffusion of Contaminant from Distributed Sources in the Ocean with Vertical Fine-Structure	200

CHAPTER 4. PRACTICAL METHODS OF CALCULATING THE CONTAMINANT DIFFUSION IN THE OCEAN	219
4.1. Numerical Studies of Contaminant Concentration Carried Out Using the Semi-Empirical Diffusion Equation	219
4.2. The Walking-Particle Method	238
4.3. Estimations of Contaminant-Concentration Fields from Discharge Facilities	260
